DETAILED ACTION

Claims 22 and 23 are pending in this application.

Action Summary

1. The rejection of claims 22 and 23 under 35 U.S.C. 112, first paragraph as containing subject matter not defined in the specification is hereby withdrawn as applicant directed the examiner to the passage in the specification where it discloses the claimed subject matter.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 22 and 23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 20 of U.S. Patent No. 6,146,648. Although the conflicting claims are not identical, they are not patentably distinct from each other because both compositions are drawn to an absorbent paper product having one surface impregnated with a lotion composition. The compositions are essentially the same except the composition of the patent

Art Unit: 1616

contains a few extra additives, which are not contained in the application. However, it is the position of the examiner that the composition of the application is not limited to just the composition stated because of the functional language "comprising".
